

Save, Make, Reinvent

We invite you and your class to learn about the Circular Economy, thinking about sustainability and climate change. We'll explore how we can reduce and re-use waste to support our environment through hands-on creative workshops. Children will tinker, create and invent solutions using everyday objects and digital tools in these activities:

Junk Bots

KS1 & 2

Natural Inks

KS1 & 2

LEGO WeDo Kits

KS2

Stop Frame Animation

KS2

Alongside live and virtual workshops, we will be lending equipment as part of our Digital Lending Library. You can also continue experimenting using iOi at Home (home.ioi.london) – our free, accessible, and fun platform to discover creative on demand content. It includes on-demand videos, how-to guides and inspiration for you and your class.

You can find out more about all of this, by contacting Michelle at Michelle.Borda@ioi.london or giving us a call on 07983079201.
